

Download Clinical Pastoral Care For Hospitalized Children And Their Families

Mission Statement. Holy Family Pastoral Care ministers to the elderly and sick members of the community with dignity and respect, offering compassionate care and encouraging a sense of belonging and connection to the Body of Christ through Eucharist and the people of God. The Division of Pediatric Endocrinology at UT Southwestern and Children's Health?, led by Perrin White, M.D., is committed to improving the health of infants, children and adolescents by providing quality clinical services, furthering the understanding of endocrinologic disease through original research and participating in the education of physicians at all levels of training. Connecticut Children's Center for Care Coordination (formerly the Special Kids Support Center) empowers families of special needs children. For more than a decade, it has provided culturally competent care coordination, working with well-established partners and community-based providers. When you're hospitalized and dealing with illness, it can be an extremely challenging time. Many people find that talking with a chaplain can help during this period.
