

Download Doctors On The Frontline : Mediterranean Doctors

Médecins Sans Frontières (MSF) translates to Doctors without Borders. We provide medical assistance to people affected by conflict, epidemics, disasters, or exclusion from healthcare. Preface This publication aims to provide up-to-date, reliable and balanced information for the management and care of arterial hypertension in the WHO Eastern Mediterranean. Although Ebola is a severe, often fatal disease, getting medical care early can make a significant difference. Today, about 1 out of 3 Ebola patients survive. Many of them are now using their experience to help fight the disease in their community. Here are their stories ... The world will be short of 12.9 million health-care workers by 2035; today, that figure stands at 7.2 million. A WHO report released today warns that the findings – if not addressed now – will have serious implications for the health of billions of people across all regions of the world.
