The HighScope early childhood education approach, used in preschool, kindergarten, childcare, or elementary school settings, was developed in Ypsilanti, Michigan in 1970. It is now common there and in some other countries. The philosophy behind HighScope is based on child development theory and research, originally drawing on the work of Jean Piaget and John Dewey. Recent research has focused on early education as an investment. NCSL has prepared this summary of the latest economic research examining early education initiatives as public investments. Many policymakers have considered early education initiatives as a school readiness strategy or as a way to ... Abstract. This paper provides a framework for estimating the economic benefits of early child development (ECD) programs, and applies it to preliminary data from the PIDI project in Bolivia. Perry was an extremely small (too small to be statistically valid) 1960s experiment (too old to be relevant today) involving 123 “at risk” low-IQ (70–85) children from one poor minority ...
