Personality and Individual Differences is primarily devoted to the publication of articles (experimental, correlational, theoretical, expository/review) which enhance our understanding of the structure of personality and other forms of individual differences, the processes which cause these individual differences to emerge, and their practical applications. In psychology, the term "cognition" is usually used within an information processing view of an individual's psychological functions (see cognitivism), and it is the same in cognitive engineering; in a branch of social psychology called social cognition, the term is used to explain attitudes, attribution, and group dynamics.. Human cognition is conscious and unconscious, concrete or abstract ...Individual differences in working memory capacity and long-term memory: The influence of intensity of attention to items at encoding as measured by pupil dilationExperiment 3: beyond mere exposure. The results of Experiment 2 demonstrate that wearing a lab coat leads to increased sustained attention on a comparative visual search task and that this effect depends on both whether the clothes are worn and the symbolic meaning of the clothes: Participants displayed greater sustained attention only when wearing a lab coat described as a doctor's coat, but ...
