

# Download Mandelbrot Set, Theme And Variations

$\{x,y,z\}^2 = \{x^2-y^2-z^2, 2xy, -2xz\}$  This method combines the Mandelbrot set with the Mandelbar set (Tricorn). I think Eric Baird was the first to suggest this formula. The right picture is a zoom of the first miniature Mandelbrot set. I think it looks like a space ship with some sort of radar gun. END OF AN ERA, FRACTALFORUMS.COM IS CONTINUED ON FRACTALFORUMS.ORG it was a great time but no longer maintainable by c.Kleinhuis contact him for any data retrieval, thanks and see you perhaps in 10 years again this forum will stay online for reference Polish-born French mathematician Benoit Mandelbrot coined the term “fractal” to describe complex geometric shapes that, when magnified, continue to resemble the shape’s larger structure.
