

Download Seal Wolf In Too Deep

Clockwise from top left: New Zealand fur seal (*Arctocephalus forsteri*), southern elephant seal (*Mirounga leonina*), Steller sea lion (*Eumetopias jubatus*), walrus (*Odobenus rosmarus*) and grey seal (*Halichoerus grypus*) The leopard seal (*Hydrurga leptonyx*), also referred to as the sea leopard, is the second largest species of seal in the Antarctic (after the southern elephant seal). The first seal fossil discovered is *Pijila darwini* 23 million years ago. These animals are highly terrestrial mammals and are known to reside in deep waters, lakes, and streams.
