A seed is an embryonic plant enclosed in a protective outer covering . The formation of the seed is part of the process of reproduction in seed plants, the spermatophytes, including the gymnosperm and angiosperm plants.. Seeds are the product of the ripened ovule, after fertilization by pollen and some growth within the mother plant. The embryo is developed from the zygote and the seed coat ...FibreSMART is a unique dietary fibre supplement, which is available in two forms: in a powdered supplement that can be mixed into water or juice, or in a capsule form.
